Dear employers!

As the Career Center of TU Wien, we are the first point of contact for around 26,000 students in all matters relating to careers and professions. To this end, we design and organize innovative career courses, career events, job portals and media with target group-relevant content. For you as a company or organization, we are the right contact when it comes to recruiting new employees, talents or young professionals.

With our tech.branding portfolio, we increase both the efficiency and effectiveness of your employer branding activities - professionally, in high quality and directly on the TU Wien campus. In line with an integrated and holistic approach, our employer branding campaigns are designed in the form of targeted events, high-impact content and target group relevance.

Our experts have extensive experience in HR consulting, recruiting & coaching as well as communication and marketing. We are happy to advise you without obligation on the possibilities of putting together and implementing cross-campaigns suitable for your company.

You can also take advantage of the opportunity to design annual campaigns to establish your employer brand at TU Wien on a long-term and sustainable basis. Benefit from short processes, direct and flexible communication and price reductions.

Would you like to talk about annual cooperation?

Please feel free to contact me:

* Intellectual capital report 2023, reporting date 6.1.2024

For students

We support students from the beginning of their studies to their successful entry into professional life.

We encourage them in their individual personal development, sensitize them to the importance of dealing with the topic at an early stage and create space for self-reflection.

We motivate students to recognize their potential, develop their career goals independently and pursue them with self-confidence.

We advise them on their individual career planning, point out opportunities and prepare them for the job market in the best possible way.

Along the way, we offer them numerous platforms as an independent interface to establish future-oriented networks with practitioners and promote interdisciplinary exchange with fellow students.

We create awareness of trends relevant to careers and the labor market and also see our mission as bringing socially important topics into focus.

We develop our innovative formats with our finger on the pulse of the times without external influence, set ourselves high quality standards and are experts in our field.

Our expertise is state of the art. We are constantly developing it further.

As an independent interface between the job market and the university, we are committed to our values and act exclusively in the interests of the students.

For employers

For companies and organizations, we increase both the efficiency and effectiveness of their recruiting processes, directly on the TU Wien campus. For these employers, we are the first and central point of contact when they want to recruit qualified employees for their company.

Our HR experts have experience in personnel consulting services, know the processes and are certified in various potential analysis procedures.

Close cooperation with companies is an important prerequisite for being able to offer insights into different professional fields. This forms the foundation of a trusting collaboration. Our clients rely on us to develop solutions for their daily challenges in employer branding and thus noticeably reduce their workload.

In terms of integrated communication, our comprehensive employer branding campaigns are designed in the form of targeted campaigns and publications (content creation) and according to dialog groups.

Combination premium ad with

Stepstone

Increase your advertising reach and benefit from the favorable combination price. The combination placement includes both the insertion on tucareer.com and the placement on stepstone.at.

585,00 EUR, duration 60 days

The advertisement is published in an individual layout (incl. your company logo) on stepstone.at will be published.

The screenshot shows a job advertisement on the StepStone platform. At the top, there are search filters for 'job title, company name or company name' and 'location or postal code', followed by a 'Jobs finden' button. The job title is 'Portfolio Analyst (w/m/d)' and the company is 'TU Career Center GmbH'. The job is located in 'Wien' and is a 'Teilzeit-Anstellung' (part-time position) with a 'Vollzeit' (full-time) option. It was published 'vor 9 Tagen' (9 days ago). The job is marked as 'Ich bin interessiert' (I am interested) and 'Speichern' (Save). The company logo 'ABACUS MEDICINE' is displayed. The job description is in German and mentions 'Entfalte dein Potential als Experte für Analysen und Zahlen' (Unfold your potential as an expert for analyses and numbers). It describes the role as a Portfolio Analyst, responsible for managing the company's portfolio of pharmaceutical products in Austria, including market research, analysis, and reporting. The job is part of a global team and involves working with colleagues in Copenhagen and Vienna.

Set your employer brand with us in a sustainable and authentic way.

TU Career content.branding is an effective method of using storytelling to spread your brand across various channels and make it customizable at the same time.

With narratives, success stories or best practice examples, you can convey your messages emotionally and arouse attention and interest. By distributing the content via various media such as print, social networks, blog posts, video or podcasts, you can reach our students with pinpoint accuracy and build a strong bond.

Use the power of content.branding to successfully establish your employer brand and inspire your target group.

What do our students appreciate about our content and media?

- Appreciation, authenticity and exclusivity
- Quality time (haptics) while reading
- Reels, videos and blog online
- Topicality and trends
- Exciting people and stories
- Interesting insights into the company
- Identification with the university

Who is our target group?

- Around 26,000 TU students from all disciplines
- approx. 3,000 graduates of the TU Vienna annually
- Participants in the talent.program and talent.internship of the TU Wien
- Participants of the workshop days “karriere.zeit”
- Visitors to the job fairs TU.day and at the start of the semester TU welcome.day

How are students at TU Wien?

- TU students aged 18-25 (Late Millennials, Gen Z)
- Digital natives with a special interest in Technology and natural sciences
- Meaning & fulfillment in the job are important
- Work-life balance is important (free time & time for family and friends)
- Prefer companies that operate according to ethical and sustainable principles act

Reach directly
and simply those
students,
who are really interested
in career and job topics
are interested.

DIGITAL FORMATS

online.advertising

The career platform tucareer.com offers all TU students and graduates important information and tips on applications, career events and current job offers.

Be at the heart of the action with your topics and your brand and address the dialog group in a targeted manner. We design your content so that it fits perfectly into our content.branding.

Your advantages

- » Current content communication
- » Cross-media possibilities/integration
- » Fast and flexible processing
- » Cost-adequate forms of advertising

Entdecke deine berufliche Zukunft

Willkommen auf unserer Website

Als Career Center der TU Wien sind wir stolz, diese Aktivitäten in einer funktionalen Karriere und Beruf, dafür entwickeln und organisieren wir detaillierte Karriere Lernveranstaltungen, Karriereweiterbildung, Workshops und Seminare mit interaktiven und innovativen Methoden, die alle darauf abzielen, die besten Karriere Lernchancen zu bieten. Wir sind stolz auf die vielen erfolgreichen Absolventen, die unsere Karriere Lernchancen genutzt haben und heute in ihren Berufen erfolgreich sind.

STUDENT MAGAZINE PRINT & ONLINE

mein.job & Blog

Put your brand in the spotlight and strengthen your employer brand at TU Wien - with exciting guest articles or impact advertisements and flank them with the mein.job.blog or our online.advertisement, which are skillfully integrated into the editorial environment. The biannual print magazine forms the content basis and is the student magazine for information and trends relating to the TUW Community, the job market, the application process and University Life. The content presents interesting employers, gives tips for finding your own skills and presents exciting success stories from the business world.

We want to offer our students the opportunity to embark on a personal journey of discovery in order to embark on a fulfilling and meaningful career path. We show ways to get to know you as an exciting company and the people behind it and to network with you in a meaningful way.

CAREER WORKBOOK

career.planner

The career.planner is a workbook to promote early career planning for students during their studies and is therefore the ideal complement to our extensive advisory services. In addition to numerous self-reflection tools for working out your own interests, strengths, skills, values and expectations, there is a lot of information and concrete tips on all relevant topics along the individual career orientation and application process.

Present yourself to the employees of tomorrow with your high-impact advertisement and make a lasting impression. This workbook has no expiration date and is also passed on within the student community. Only the cover pages can be booked in career.planner.

JOB PROFILES CATALOG

job.im.blick

We present your job profiles.

Companies from industry, research and business present technical and scientific careers – digitally, climate-neutrally and with an eye to the future. This is how TU Wien students get a clear insight into their career opportunities.

The print catalog is breaking new ground:

With our new digital platform, you can present your job profiles in a sustainable and always up-to-date way.

More than one page in the catalog – a cross-media campaign.

Put your company in the spotlight: With social media boosts, interactive billboards and authentic content that appeals to young talent, you can offer future professionals an inspiring insight into their professional future while strengthening your employer brand.

tech.
brand.
ing.

Practice in focus

Give future employees authentic insights into your company.

On a customizable page, you have the opportunity to present your profession based on key questions and to supplement it with logos, images and a description of your company.

Focus on the main tasks, goals, responsibilities and interfaces of everyday work to provide a realistic and inspiring impression.

Job and career fair
on location

May

“It was another great and super organized trade fair. We had a lot of fun being there and we’d love to come back next year!”

Bosch-Group Austria

welcome.day

semester kick-off
on location

October

“As an association, the trade fair is a unique opportunity for us to get in touch with students at an early stage and to make initial contacts in the form of internships. We offer young talents the opportunity to get involved and grow with us. It is inspiring to see the enthusiasm and motivation with which the students contribute to creative and innovative solution processes in day-to-day business. The fair is therefore an annual and joyful must-attend event for us!”

Verbund

November

“Good information in advance, uncomplicated, very well advertised, very interesting discussions with students”

Energie AG

WORKSHOP DAYS

karriere.zeit

Professional topics are clearly the focus when TU students get an idea of future employers and career and job prospects!

karriere.zeit offers you the ideal platform for intensive professional and personal exchange with interested students, graduates and potential applicants from the departments relevant to you as part of interactive workshops at TU Wien.

Create a workshop individually tailored to your company and inspire young talent! After the live workshop, there will be space and time on site to continue talking to students in a relaxed atmosphere.

How to inspire the young professionals for yourself.

Specify >>>

Specify the time frame for your 1.5-hour face-to-face workshop at TU Wien.

Define >>>

Define an exciting topic for the students. We will be happy to advise you with our experience.

Position >>>

Together we will position your workshop coherently in the overall program.

The karriere.zeit for students is rounded off by an attractive application program from the TU Career Center.

Specialist workshops with companies are one of the most important sources of information about future employers for our students at TU Wien. According to our current study “Young Austrians”, one third of students use this opportunity to make contact with companies. So join us and get to know our motivated students on a professional and personal level.

SEMESTER KICK-OFF

TU welcome.day

TU welcome.day serves as a university-wide platform to welcome students to TU Wien in the new semester. At the start of the semester, the diverse services and offers of TU Wien are to be presented, but also the offers and career opportunities of external partners are to be highlighted. The aim of the TU welcome.day is therefore to present the interaction of TU Wien, its internal players and its departments integrated in one fair.

Be a part of it

Present yourself from your best side and increase your visibility -
like the partners of TU welcome.day 2024.

Discover your future employees

Laura Höfinger, MSc
T: +43 664 605 88 78 16
E: laura.hoefinger@tucareer.com

Good reasons why you should take part in welcome.day 2025 should be there:

- Position yourself as a Student Love Brand at one of Austria's most important universities.
- Meet students and young professionals from technology and natural sciences directly on campus.
- Convince and win over your top young talent for you.
- Discover the TU Vienna, its diversity and worlds of knowledge and become part of our career community at TU welcome.day 2024.

Our complete packages are the most convenient way to present yourself on TU welcome.day. They already include all services. For more individual stand solutions, the space prices and of course our consulting services apply. Please feel free to contact us. Together we will find the right solution.

RECRUITING FORMAT

talente. programm

The talente.programm of TU Wien is a course in the field of transferable skills/soft skills with 3 ECTS. This course is run by the Vice-Rector for Studies and Teaching, Dr. Jasmin GRÜNDLING-RIENER.

The aim is to train students in the application process and bring them into contact with companies during their studies. The course is designed for Bachelor's, Master's and PhD students. We present different companies each semester.

Top talents are always on the lookout for challenges. With the talente.programm, we offer the opportunity to bring your company to life.

**The talente.programm is a
course in TU Wien's transferable skills catalog and is worth 3
ECTS credits.**

Your advantages

- >> Top talents according to field of study
- >> Professional and high-quality pre-selection
- >> Talent pool incl. CVs
- >> Present your own corporate values and inspire enthusiasm for them
- >> Target group-oriented platform for your employer branding
- >> Sustainability through networking in the long term

Christina Habelter, BSc.

Find out about the
currently participating
companies and dates:
www.tucareer.com/Talenteprogramme/
Talent programs

01 Application and registration phase

Around 26,000 students at TU Wien are made aware of the current talente.programm through all communication channels. Students are pre-selected by field of study and on the basis of predefined, company-specific criteria. The application is already designed like an application process and offers training on neutral ground, including a video application.

02 Workshop and preparation

In a full-day workshop, 50 to 70 students prepare themselves for the companies and are introduced to the concept and process of the program. Application training is also part of the program.

03 OPENING - Get to know each other personally

At an all-day kick-off event, the so-called OPENING, students meet 2 companies each and get to know each other personally for the first time. As part of a “chess dialog”, a format specially developed by us.

The chess dialog is reciprocal and places a clear focus on personal skills. This means that students and companies have an equal share of speaking and answering.

The clear structure of the chess dialog, based on competencies, enables a qualitatively valuable discussion for both partners.

04 Company Events

After the “Opening”, the students decide on one of the two companies presented, which they get to know even better during two “Company Days”.

On these two days, students have the opportunity to consolidate their impression of the company on site and discuss possible career options.

05 CLOSING Final event

At the CLOSING, all participating companies and students meet once again to report on their experiences as part of the talente.program and to network again.

1**Application phase & Selection procedure:**

- ▶ Application phase for students of TU Wien
- ▶ Talent screening: Selection by the TU Career Center
- ▶ Allocation of talents according to field of study

**2****Preparatory workshop** (1 Day)

for students before the OPENING

**3****OPENING** (1 Day)

- ▶ Stage to get to know the talents and companies
- ▶ Setting: as part of the chess dialog

**4****Company Event** (2 Days)

Setting: Event directly at the individual companies

**5****CLOSING** (Final Event - Evening)

- ▶ Presentation training for students in advance
- ▶ Final event with all talents & companies
- ▶ Stories of success, presentations and networking

- » Course in the area of transferable/soft skills
- » approx. 70 TU Wien students from all fields of study
(except architecture and civil and environmental engineering)
- » designed for Bachelor, Master and PhD students
- » Duration: 1 semester, 3 ECTS
- » Summer and/or winter semester
- » Changing companies
- » 100% attendance of the students

“People who haven’t been on the program often think that applying is always a struggle. After the preparatory workshops, you can go into the process and subsequent job interviews much more relaxed. And as part of the chess dialog, you also see that companies also have to make an effort to get people.

At the TU itself, there are few opportunities to get in touch with companies and the format is usually only scholarships. That’s why the program is unique at the university. Everything was also very well organized - by the companies themselves and by the TU Career Center.” [Maximilian Sutrich, 25](#)

FOTO: **DANIELA SCHUSTER**

We tell these and many other exciting stories in mein.job Magazine & Blog.

RECRUITING FORMAT

talente. praktikum

The talente.praktikum for civil and environmental engineers is a spin-off of the talente.program and is implemented in close cooperation with the Faculty of Civil and Environmental Engineering.

In this internship, the future is written - meaningfully, sustainably and with great enthusiasm. Top talents in the fields of civil and environmental engineering present themselves as part of an application process and experience the working world in a practical and realistic way directly in your company.

PROMOTION

We will advertise your participation prominently as part of an online and offline campaign via the Dean's Office and the TU Career Center:

- » Website
- » Direct mailings
- » Social media
- » Folders and posters

SELECTION

Our experts filter, evaluate and categorize applicants to find and assign your top talents.

- » Video application
- » Selection
- » Organization
- » Customer briefing

EVENTS

We organize the events for you, including scheduling (technology and support).

- » Preparatory workshop
- » Opening event
OPENING incl. chess dialog
- » Closing event (CLOSING)

"The internship in Sweden with Strabag was the highlight of my internships so far. It was a new experience to work for a company abroad for a longer period of time. My main tasks included documenting the work and the construction process. I was involved in checking the formwork and reinforcement. The team integrated me into many meetings and I was allowed to take part in the discussions."

[Johanna Humer, Internship at Strabag and FCP](#)

"With the talente.praktikum, we want to show the wide range of fields of activity for prospective civil and environmental engineers, offer career guidance and familiarize our students with the job market right from the start"

[Univ.-Prof. Dipl.-Ing. Dr.techn. Ronald Blab, Dean of the Faculty of Civil and Environmental Engineering](#)

RECRUITING FORMAT

voice.of. diversity

With voice.of.diversity, we are expanding our portfolio to bring students and employers together on the basis of a scientifically sound format. The Center for Informatics and Society (CIS) launched the DEBIAS tool together with the Career Center of TU Wien to reduce bias and discrimination in the recruiting process.

**voice.of.diversity is a
course in the transferable skills catalog of TU Wien and is
worth 1 ECTS.**

Do you see the diversity and equal
opportunities of your
employees as a success factor for your
business activities?

What is unconscious bias?

Unconscious bias and related cognitive effects influence our perception in many areas of life: Especially in recruiting, however, these biases can have serious consequences! Effects such as the “halo effect” make people who are likeable to us appear more competent. Unconscious, internalized, racist or xenophobic tendencies can also influence our assessments through a person’s surname.

Julia Hainitz, MA **Managing Director TU Career Center**

“With voice.of.diversity, we have created a way to anonymously process and evaluate recruitment interviews. With the DEBIAS tool (Digitally Eliminating Bias in Application Selection), the experts conducting research at the Faculty of Computer Science have created an IT support tool and a pilot project that can minimize the mechanisms of unconscious bias in recruiting processes.”

Dipl.-Ing. Florian Cech, **Centre for Informatics and Society**

“Three aspects are of particular importance to us in this context. The principle of anonymization is a necessary prerequisite. Biases such as gender, age and appearance, but also secondary characteristics such as ethnic origin and migration background, some of which can be deduced from the name, are particularly common. The companies will therefore not receive any CVs or other data from the students. A predefined, clear structure of the interview has proven to be particularly effective in scientific experiments. The DEBIAS tool specifies that the questions should be the same for everyone and that they should be asked in the same order. This allows a better and comparative evaluation of the persons. The questions are also relatively weighted.”

Why should you be part of it?

- » Learn to recognize and minimize unconscious discrimination processes
- » Make contact with highly qualified technicians that you might overlook in conventional application processes.
- » Positioning as an innovative employer that, takes diversity seriously.
- » Gain experience and knowledge to optimize your own recruitment processes.
- » You reach students who may not even have considered a career in your company.

Price

Prerequisite for participation:

1. A corporate culture that already embraces diversity and promotes equal opportunities with the appropriate commitment.
2. Openness and willingness to try new approaches to recruiting and to reflect on one's own practices and processes in the process.
3. Interest in recruiting from the selected fields of study at TU Wien.

The process

The meeting between students and companies takes place directly at the TU Wien.

Step 1: 30-minute DEBIAS chat

A lot happens before the students, who are interested in different positions in the companies, talk to the company representatives: Both parties are optimally prepared. The students receive company-specific questions in advance, in which both professional and personal facts are briefly queried – without private details about the person. In the next step, the DEBIAS chat is used, in which company representatives can respond to the students' answers and ask follow-up questions.

Step 2: 15-minute interview

Immediately after the 30-minute written, anonymous chat (without sound or images), a 15-minute personal live conversation takes place. The curtain falls on both sides. This is where self-reflection begins, and, if necessary, insight.

Lukas Ramach (Managing Director BOC Group): „Diversity in all its facets was anchored in our corporate culture long before it became a trending topic. We are convinced that this diversity helps us as a company to find better solutions for our customers. When we heard about the “voice.of.diversity” initiative from the TU Career Center, it was immediately clear that it was a perfect fit for us. The clear focus on giving people a chance who may not always have it so easy, and the whole thing with scientifically sound support, appealed to us greatly. The format helped us to focus even more consciously on where we are confronted with biases despite all our openness. In fact, you can't tell from the answers in the chat tool what kind of person is really standing in front of you. There is a discrepancy between the real appearance of the applicants and the image in our minds, and there are some surprises. The best result is that we have found employees from every round who are still with our company to this day.”

Foto: © Ruiz Cruz

”

Sabine Leisentritt (HR Management at WIEN ENERGIE)

summarizes her experiences of the day: “The event has made us aware of many things, and we would like to rethink our recruiting in the future in order to exclude possible biases as much as possible.”

look like tomorrow”**

FEMALE EMPOWERMENT - PROGRAM

TU.impact

The promotion of female empowerment, social skills and intergenerational activities in companies is becoming increasingly important. Through measures in these areas, companies can not only have a positive impact on society, but also create an inclusive and diverse working environment.

In cooperation with the MINTality Foundation, we offer your company the unique opportunity to play an active role in shaping the future of STEM professions and strengthen your employer branding at the same time.

On the one hand, TU Wien students inspire schoolgirls for STEM subjects, on the other hand, female role models are brought in front of the curtain. This program creates an intergenerational exchange between schoolgirls, female TU students and female specialists from your company.

The Female Empowerment program is a course in the TU Wien transferable skills catalog and is worth 3 ECTS credits.

“I want to do something meaningful.“*
98%.

The 3 pillars of the Female Empowerment Program

Social Skills & Engagement

The study "How MINT wins" by the MINTality Foundation and Hagenberg University of Applied Sciences proves once again that girls are not given enough encouragement to venture into technology and try out new roles.

Through practical workshops, we therefore promote essential soft skills among female TU students and prepare them for the challenges of the professional world.

These female students become ambassadors for STEM professions and share their enthusiasm with schoolgirls in local educational institutions.

As a participating company, you benefit from these committed, future-oriented women who take on social responsibility and develop leadership qualities at an early stage.

You also position yourself as a company that promotes social commitment and actively contributes to the education of young people.

Female Empowerment

Our program focuses specifically on promoting female talent in STEM fields. We create spaces for exchange, inspiration and networking, especially for young women.

By actively participating in our program, you as a company not only signal your commitment to more diversity in technical professions, but also gain direct access to highly qualified young female talent.

You strengthen your corporate culture through diversity and become part of a forward-looking initiative that actively combats the shortage of skilled workers in STEM professions and at the same time promotes gender parity in technical professions.

Role Model Cross Generational

At the heart of our program is the intergenerational exchange between schoolgirls, female students and experienced professionals from your company.

Your female managers become inspiring role models for the next generation and provide valuable first-hand insights.

The exchange not only creates valuable networks for everyone involved, but also offers your company the opportunity to get to know the fresh perspectives of young talent.

You position your female employees as role models in the industry and establish long-term relationships with potential future employees - from initial school contact to direct recruitment.

Application & registration

- ▶ Application phase for female students of all fields of study
- ▶ Selection of students by the TU Career Center

Workshops and school visits

- ▶ Soft skills workshops for female students (organized by the TU Career Center)
Communication training, emotional intelligence, intercultural competence, leadership competence
Problem-solving skills and critical thinking, female empowerment, unconscious biases
- ▶ School visits: female students inspire schoolgirls for STEM careers
- ▶ Workshop with your female role model for the students

Student

Schoolgirls

Role Model

Panel Discussion - Networks

- ▶ Panel discussion: Cross-generational exchange between all participants (networking opportunity),
Setting: Talk / panel discussion by the TU Career Center

Guided tours within the company

- ▶ Practical insights into your day-to-day work for schoolgirls and female students
- ▶ Cross-generational promotion of
Women/girls in technology and natural sciences

These events concern the participating participating companies:

They receive direct access to the selected TU students, including their CVs.

recruiting.

We are also happy to support you in filling specialist and management positions. The individual and personal support provided by qualified consultants is particularly important to us.

Transparency, appreciation and commitment are our top priorities.

We offer you professional handling of your search processes based on many years of experience. Depending on the requirements profile, we conduct the search ourselves or with external advice. We will be happy to provide you with more information.

potential. diagnostics

Our test procedures provide our customers with valuable insights when making personnel decisions in the context of selection or development and give them the opportunity for an objective assessment of their position with regard to subject-independent competencies. To minimize risk and ensure quality, we offer the option of creating detailed competency profiles as part of potential analyses. This is available for both existing and future employees.

Our testing procedures include a written evaluation. The detailed interpretation and a joint reflection on the personality profile take place in the context of an individual feedback session with certified consultants from the TU Career Center.

Compare the results with your expectations. What behavioral competencies does the job profile require?

**tech.
brand.
ing.**

This is how it works

A potential analysis is based on the purpose of the evaluation and is therefore always customized. A meaningful profile of strengths, talents and development opportunities is created using an online questionnaire.

Diagnostic tests provide information about:

- personal strengths, preferences and areas for development
- behavioral patterns in certain situations
- personal communication style
- contribution to the team
- opportunities for personal development

JobMatch

„JobMatch“ is a psychometric test procedure that creates a precise profile of a person's work-related characteristics and working style.

It enables a detailed measurement of various competences in the following areas:

- task-related competences
- interpersonal competences
- self-related competences

potential diagnostics „JobMatch“

Including: implementation of the potential diagnostics, competency-based questionnaire incl. feedback session with candidates and feedback session with the specialist department.

CAPTain

CAPTain is a psychometric test procedure that systematically records information on a person's behavioral style and analyzes and evaluates it on the basis of an evaluation algorithm based on occupational psychology.

For management positions, we recommend „CAPTain“, a diagnostic tool that provides insights into the working and performance styles of candidates.

Clear focus is on:

- Design of leadership
- Behavior in a team
- Dealing with tasks in a professional context

We get a look at objective, actual behavior and relate it to the socially desired result. All our consultants who offer you „CAPTain“ projects are certified for this potential diagnostics.

potential diagnostics „CAPTain“

Including: Potential diagnostics, license plus feedback interview with the candidates and interview with the specialist department.

What our
students and
customers say...

“In the pleasant ambience of the domed hall at TU Wien, I was able to talk to the leaders of the construction companies on an equal footing and also ask them critical questions as part of the chess dialogues. The internship was a great opportunity to get to know the companies and make contacts.”

Raoul Ellmer, BA (26)

“Thanks to the talent program, I learned how to prepare for an application process. I liked the fact that I was able to immediately apply the theory I was presented with in real job interviews with exciting, relevant companies. In particular, the look behind the scenes of recruiting was very interesting for me and something completely new. On a personal level, I have learned the mental attitude with which I go into a job interview. I still get a little nervous during job interviews, but I now see things from an angle that helps me stay cool.”

When looking for new talent, we appreciate the wide range of services offered by the TU Career Center. Whether it's content-related workshops at *karriere.zeit* or the TU Wien talent program, where we support motivated students over a longer period of time. The wide range of formats gives us the opportunity to get to know the students at TU Wien in different ways and to spark their interest in Accenture. The Career Center team is always responsive to the individual needs of students and companies. We look forward to many more encounters with the engineers of the future!

"We use the TU Career Center as a platform to strengthen our employer brand and to recruit highly qualified talent. As the largest European and Austrian IT service provider, Atos is driving this cooperation because, as an innovative big player in the IT sector, we not only support the digitalization of our customers, but also research, develop and implement the IT solutions of the future. This gives us the opportunity to get in touch with creative students and graduates and offer them interesting prospects in the digital industry. Students are actively involved in customer projects during their studies. This allows individual strengths and preferences to be discovered and developed."

Johann Martin Schachner
CEO
Atos Austria

“As an innovative, lateral-thinking and globally active online retailer and e-commerce service provider made in Austria, we – nice-shops GmbH – are always looking for people who want to live out their passion for IT professionally. We offer nice-jobs that adapt to the circumstances and needs of our colleagues and not the other way around. Instead of rigid budget and time constraints, we focus on personality and individual strengths. Our nicepeople work creatively and independently – in an attractive environment (free breakfast and lunch, massages, flexible working hours, and much more). We are enthusiastic about our collaboration with the TU Career Center – this is how we get to know highly qualified, future nice-people.”

“The TU Career Center brings us closer to the engineering talents of today and tomorrow through its wide range of services! As a manufacturer of fresh cosmetics, it is particularly important to us to draw the attention of students at the TU Vienna to the variety of jobs we offer in the fields of technical and industrial engineering, especially in IT. During TUDay, we were already able to inspire numerous students with both our corporate brand and our career opportunities. Thanks to our professional and competent collaboration with the TU Career Center, we are able to network and exchange ideas with motivated and qualified students as well as graduates. We look forward to further successful cooperation!”

Dipl.-Ing. Dr. Michael Russ
COO
RINGANA GmbH

Foto: © RINGANA GmbH

“The construction industry is facing major challenges – digitalization, climate change adaptation, energy supply. As Austria’s leading construction company, we want to rethink the construction of the future and boldly lead the way. We are always looking for motivated and digitally savvy young professionals who will work as a team to advance climate-friendly construction. The TU Career Center is a professional partner in this regard and provides us with optimal Numerous TU graduates are already working on our innovation and sustainability projects, and we look forward to welcoming many more highly trained young professionals.”
